Containers, VMs and Docker

Software is a collection of data or computer
instructions that tell the computer how to
work. This is in contrast to physical
hardware, from which the system is built and
actually performs the work. In computer
science and software engineering, computer
software is all information processed by
computer systems, programs and data. Computer
software includes computer programs,
libraries and related non-executable data,
such as online documentation or digital
media. Computer hardware and software r
