AMAL Carburetter Hints and Tips How the Carburetter Works The carburetter proportions and atomises the right amount of petrol with the air that is drawn in by the engine because of the correct proportions of jet sizes and the main choke bore. The float chamber maintains a constant level of fuel at the jets and cuts off the supply when the engine stops.

AMAL Carburetter Hints and Tips - Classic Bike

Carburetters used constantly at altitudes 3,000 to 6,000 feet should have a reduction in the main jet size of 5%, and thereafter for every 3,000 feet in excess of 6,000 feet altitude, further reductions of 4% should be made. General Hints and Tips. Amal Monobloc Hints.
