The Avenio M is a multi-articulated tram with outstanding curve-negotating characteristics. It builds on the experience gained with the Combino, the world's first modular tram platform, together with the success of the Avenio generation.

**Avenio | Trams and light rail | Global - Siemens Mobility**

From the Combino to the Avenio M Following a Europe-wide tendering process, SWU Verkehr GmbH and Siemens signed a contract for the supply of 12 Avenio M series vehicles on May 22, 2015. This order marks a new chapter in the success story of the Combino, a modular low-floor tram system originally introduced in 1994.

**Avenio M - Siemens**

Avenio M – highly flexible multi-articulated tram with 100% low floor The Avenio M is a multi-articulated tram with outstanding curve-negotiating characteristics. It builds on the experience gained with the Combino, the world's first modular tram platform, together with the success of the Avenio generation.

**Avenio - Siemens**

Avenio M is the latest variant in the Avenio family of light rail vehicles (LRVs) manufactured by Siemens. The multi-articulated tram features a completely welded aluminium car body.
