An Integrated Management System (IMS) integrates all of an organization's systems and processes into one complete framework, enabling an organization to work as a single unit with unified objectives.

What is an Integrated Management System? | Integrated ...

An Integrated Management System (IMS) combines all aspects of an organisation's systems, processes and Standards into one smart system. This merger allows a business to streamline its management, save time and increase efficiency by addressing all elements of the management system as a whole.

What is an Integrated Management System?

The main purpose of the integration management is to manage and coordinate all the processes and activities during the project life cycle. It also conducts the project as a whole in order to produce significant outputs. So each of the project integration management processes has another purpose to achieve the main objective.

Project Integration Management Processes: Project's Gear ...

4.4 Integrated Management System and Its Processes 4.4.1 Process Identification Proform uses a process approach for its IMS. By identifying the top-level processes within the company, and then managing each of these discretely, Proform reduces the potential for nonconforming products discovered during final processes or after delivery.
