It is a mixture because mixtures are two or more ingredients mixed together. Salt and water are two ingredients. It's a solution because the salt dissolves and the water stays clear. All solutions are mixtures. Define 'dissolving': a process in which a solid material seems to disappear into a liquid.

mixtures and solutions study guide Flashcards | Quizlet

Mixtures and solutions are seen in many aspects of our daily lives. A mixture can be separated back into its individual parts because the ingredients maintain their physical properties , their ...
